

ECO-CLICKS GLUELESS CORK FLOATING FLOOR LEED CREDITS

Cork flooring is made from a rapidly renewable resource, which is harvested in 7-9 year cycles. The cork tree is not damaged in any way when the bark is harvested.

All cork used in cork flooring is post-industrial waste.

Capri's Eco-Clicks Cork Flooring can achieve LEED credits in the following areas.

MATERIALS & RESOURCES

MR4.1: Use materials with recycled content such that the sum of the post-consumer recycled content plus ½ post-industrial recycled content constitutes at least 5% of the total value of the materials in the project. (1 point)

MR4.2: Use materials with recycled content such that the sum of the post-consumer recycled content plus ½ the post-industrial recycled content constitutes at least 10% of the total value of the materials in the project. (1 point)

MR6: Use rapidly renewable building materials and products (made from plants that are typically harvested within a ten-year cycle or shorter) for 5% of the total value of all building materials and products used in the project. (1 point)

INDOOR ENVIRONMENTAL QUALITY

IEQ 4.1 The VOC content of adhesives and sealants used must be less than the current VOC content limits of South Coast Air Quality Management District Rule #1168 and all sealants used as filters must meet or exceed the requirements of the Bay Area Air Quality Management District Regulations 8, Rule 51. (1 point)

All Eco-Clicks adhesives (for commercial use) and polyurethanes meet or exceed the above requirements.
